SPECIFICATIONS

(1) ABSTRACT FROM MAIN SPECIFICATION (Classified by Standards Association)

1. JIS Specifications (Japanese Industrial Standards) <table> <tr> <td>G3101</td> <td>Steel plates for general structures</td> </tr> <tr> <td>G3103</td> <td>Steel plates for boilers</td> </tr> <tr> <td>G3106</td> <td>Steel plates for welded structures</td> </tr> <tr> <td>G3114</td> <td>Hot-rolled atmospheric corrosion resisting steel plates for welded structures</td> </tr> <tr> <td>G3115</td> <td>Steel plates for pressure vessels</td> </tr> </table>	G3101	Steel plates for general structures	G3103	Steel plates for boilers	G3106	Steel plates for welded structures	G3114	Hot-rolled atmospheric corrosion resisting steel plates for welded structures	G3115	Steel plates for pressure vessels	6. BS Specifications (British Standards Institution) <table> <tr> <td>BS15</td> <td>Steel plates for general structures</td> </tr> <tr> <td>BS1501-151</td> <td>Carbon steel plates for pressure vessels</td> </tr> <tr> <td>BS2762</td> <td>Notch ductile steel plates for bridges and general building construction</td> </tr> <tr> <td>BS4360</td> <td>Weldable structural steel plates</td> </tr> </table>	BS15	Steel plates for general structures	BS1501-151	Carbon steel plates for pressure vessels	BS2762	Notch ductile steel plates for bridges and general building construction	BS4360	Weldable structural steel plates								
G3101	Steel plates for general structures																										
G3103	Steel plates for boilers																										
G3106	Steel plates for welded structures																										
G3114	Hot-rolled atmospheric corrosion resisting steel plates for welded structures																										
G3115	Steel plates for pressure vessels																										
BS15	Steel plates for general structures																										
BS1501-151	Carbon steel plates for pressure vessels																										
BS2762	Notch ductile steel plates for bridges and general building construction																										
BS4360	Weldable structural steel plates																										
2. Kawasaki Specifications <table> <tr> <td>VP</td> <td>Steel plates for gas vessels</td> </tr> <tr> <td>AG</td> <td>Steel plates for galvanizing pots</td> </tr> <tr> <td>PV</td> <td>Steel plates for pressure vessels</td> </tr> <tr> <td>RIVER ACE</td> <td>Quenched and tempered high tensile strength steel plates</td> </tr> <tr> <td>KH, HTP</td> <td>High tensile strength steel plates</td> </tr> <tr> <td>RIVER TEN</td> <td>Atmospheric corrosion resisting steel plates</td> </tr> <tr> <td>RIVER TEN</td> <td>Atmospheric corrosion resisting steel plates for welded structures</td> </tr> <tr> <td>RIVER TEN-R</td> <td>Atmospheric corrosion resisting steel plates for rolling stock</td> </tr> <tr> <td>RIVER TEN</td> <td>Sulfuric-acid resisting steel plates</td> </tr> <tr> <td>MARINER</td> <td>Anti-marine steel plates</td> </tr> <tr> <td>KL, RIVER ACE</td> <td>Steel plates for low temperature service</td> </tr> </table>	VP	Steel plates for gas vessels	AG	Steel plates for galvanizing pots	PV	Steel plates for pressure vessels	RIVER ACE	Quenched and tempered high tensile strength steel plates	KH, HTP	High tensile strength steel plates	RIVER TEN	Atmospheric corrosion resisting steel plates	RIVER TEN	Atmospheric corrosion resisting steel plates for welded structures	RIVER TEN-R	Atmospheric corrosion resisting steel plates for rolling stock	RIVER TEN	Sulfuric-acid resisting steel plates	MARINER	Anti-marine steel plates	KL, RIVER ACE	Steel plates for low temperature service	7. BV Specifications (Bureau Veritas) <table> <tr> <td>BV</td> <td>Steel for construction of hulls and engine parts</td> </tr> </table> 8. CR Specifications (China Corporation Register of Shipping) <table> <tr> <td>CR</td> <td>Quality and testing of materials of hull, equipment, boiler and machinery</td> </tr> </table>	BV	Steel for construction of hulls and engine parts	CR	Quality and testing of materials of hull, equipment, boiler and machinery
VP	Steel plates for gas vessels																										
AG	Steel plates for galvanizing pots																										
PV	Steel plates for pressure vessels																										
RIVER ACE	Quenched and tempered high tensile strength steel plates																										
KH, HTP	High tensile strength steel plates																										
RIVER TEN	Atmospheric corrosion resisting steel plates																										
RIVER TEN	Atmospheric corrosion resisting steel plates for welded structures																										
RIVER TEN-R	Atmospheric corrosion resisting steel plates for rolling stock																										
RIVER TEN	Sulfuric-acid resisting steel plates																										
MARINER	Anti-marine steel plates																										
KL, RIVER ACE	Steel plates for low temperature service																										
BV	Steel for construction of hulls and engine parts																										
CR	Quality and testing of materials of hull, equipment, boiler and machinery																										
3. AB Specifications (American Bureau of Shipping Rules) <table> <tr> <td>AB</td> <td>Ordinary strength hull structural steel plates</td> </tr> <tr> <td>AB</td> <td>High strength hull structural steel plates</td> </tr> </table>	AB	Ordinary strength hull structural steel plates	AB	High strength hull structural steel plates	9. DIN Specifications (Deutscher Normenausschuss) <table> <tr> <td>DIN 17100</td> <td>Steel plates for general structural purposes</td> </tr> </table> 10. CSA Specifications (Canadian Standards Association) <table> <tr> <td>G40.8</td> <td>Structural steel plates with improved resistance to brittle fracture</td> </tr> </table> 11. LR Specifications (Lloyd's Register of Shipping Rules) <table> <tr> <td>LR</td> <td>Mild steel plates for hull structures</td> </tr> <tr> <td>LR</td> <td>Higher tensile steel plates for hull structures</td> </tr> </table>	DIN 17100	Steel plates for general structural purposes	G40.8	Structural steel plates with improved resistance to brittle fracture	LR	Mild steel plates for hull structures	LR	Higher tensile steel plates for hull structures														
AB	Ordinary strength hull structural steel plates																										
AB	High strength hull structural steel plates																										
DIN 17100	Steel plates for general structural purposes																										
G40.8	Structural steel plates with improved resistance to brittle fracture																										
LR	Mild steel plates for hull structures																										
LR	Higher tensile steel plates for hull structures																										
4. AAR Specifications (Association of American Railroads) <table> <tr> <td>M128</td> <td>High tensile strength plates for tank car tanks and other pressure vessels</td> </tr> </table>	M128	High tensile strength plates for tank car tanks and other pressure vessels	12. NK Specifications (Nippon Kaiji Kyokai) <table> <tr> <td>NK</td> <td>Ordinary steel plates for hull construction</td> </tr> <tr> <td>NK</td> <td>High strength steel plates for hull construction</td> </tr> </table>	NK	Ordinary steel plates for hull construction	NK	High strength steel plates for hull construction																				
M128	High tensile strength plates for tank car tanks and other pressure vessels																										
NK	Ordinary steel plates for hull construction																										
NK	High strength steel plates for hull construction																										
5. ASTM Specifications (American Society for Testing of Materials) <table> <tr> <td>A113</td> <td>Structural steel plates for locomotives and cars</td> </tr> <tr> <td>A131</td> <td>Structural carbon steel plates for ships</td> </tr> <tr> <td>A242</td> <td>High strength low alloy structural steel plates</td> </tr> <tr> <td>A283</td> <td>Low and intermediate tensile strength carbon-steel plates of structural quality</td> </tr> <tr> <td>A387</td> <td>Chromium-molybdenum alloy steel plates for pressure vessels</td> </tr> <tr> <td>A455</td> <td>Carbon-manganese steel plates for pressure vessels</td> </tr> <tr> <td>A515</td> <td>Carbon steel plates for pressure vessels for intermediate and higher temperature service</td> </tr> <tr> <td>A516</td> <td>Carbon steel plates for pressure vessels for moderate and lower temperature service</td> </tr> </table>	A113	Structural steel plates for locomotives and cars	A131	Structural carbon steel plates for ships	A242	High strength low alloy structural steel plates	A283	Low and intermediate tensile strength carbon-steel plates of structural quality	A387	Chromium-molybdenum alloy steel plates for pressure vessels	A455	Carbon-manganese steel plates for pressure vessels	A515	Carbon steel plates for pressure vessels for intermediate and higher temperature service	A516	Carbon steel plates for pressure vessels for moderate and lower temperature service	13. NV Specifications (Norske Veritas) <table> <tr> <td>NV</td> <td>Hull structural steel plates</td> </tr> <tr> <td>NV</td> <td>Shipbuilding steel plates with controlled yield strength</td> </tr> </table> 14. GL Specifications (Germanischer Lloyd) <table> <tr> <td>GL</td> <td>Hull structural steel plates</td> </tr> <tr> <td>GL</td> <td>High tensile hull structural steel plates</td> </tr> </table>	NV	Hull structural steel plates	NV	Shipbuilding steel plates with controlled yield strength	GL	Hull structural steel plates	GL	High tensile hull structural steel plates		
A113	Structural steel plates for locomotives and cars																										
A131	Structural carbon steel plates for ships																										
A242	High strength low alloy structural steel plates																										
A283	Low and intermediate tensile strength carbon-steel plates of structural quality																										
A387	Chromium-molybdenum alloy steel plates for pressure vessels																										
A455	Carbon-manganese steel plates for pressure vessels																										
A515	Carbon steel plates for pressure vessels for intermediate and higher temperature service																										
A516	Carbon steel plates for pressure vessels for moderate and lower temperature service																										
NV	Hull structural steel plates																										
NV	Shipbuilding steel plates with controlled yield strength																										
GL	Hull structural steel plates																										
GL	High tensile hull structural steel plates
